

CASE STUDY

*Taking the lead on environmental performance.*

Our customers and other stakeholders value healthy rivers and want us to continue improving our local environment. That's why environmental performance is central to our plans.

We've invested more and achieved another record breaking year at our waste water treatment works. Of more than 700 sites, 99.9% met their compliance limits.

We've also further reduced the number of pollution incidents, by improving the way we work and launching new training for our people and subcontractors. Our environmental performance over the last year places us amongst the best in the industry. We'll continue to work hard to improve our local environment, with our plan for AMP6 including no fewer than 12 performance commitments.

# FUTURE IS PROTECTING
